Details Matter When Shipping

Material Handling is the unloading of your exhibit materials. The service includes delivery to your booth, handling of empty containers to and from storage and removal of your materials from your booth for reloading onto your outbound carrier. This is not to be confused with the cost to transport your exhibit material to and from the event.

- Unloading the freight and delivery to your booth is not included. Avoid unexpected costs at show site and estimate the cost for this service. <http://e.ges.com/024600644/item/200500>
- We understand that your calculation is only an estimate. Invoicing will be done from the actual weight. Adjustments will be made accordingly.
- Save by combining shipments. A minimum charge applies for each shipment under 200 lbs.
- Make sure that a Bill of Lading is filled out completely for each shipment.
- Confirm that your driver has the correct dates and times that your shipment needs to be delivered and picked up.
- Use provided shipping labels to make sure show name, booth number and other vital information is provided.

- Make sure your credit card information is complete and correct, including the expiration date.
- Review GES Payment Policy and the Terms and Conditions of Contract.
- Clearly indicate when paying by check. All check payments should be returned to:

No Tipping

GES work rules prohibit the solicitation or acceptance of tips in cash, products or gifts of any kind by any employee. Our employees are paid appropriate wages denoting professional status; therefore, tipping of any kind is prohibited.

Where Did My Crates Go?

After your exhibit is set-up and your products displayed, you must place "empty" stickers on your empty containers for storage during the show. At show site a kiosk with a floor plan and color coded "empty" stickers will be available. Crews will clear the floor of all "empty" stickered containers to clear room for other freight.

- Simply write your booth number, company and show name on the sticker and place the container in the aisle. It will be stored throughout the exposition and then returned to your booth upon show close.
- Place stickers on all four (4) sides of the crate.
- Please label your empty containers as soon as possible to keep your area clear and make it easier to prepare your booth.

Don't Forget to Take Out the Trash

Exhibitors planning on disposing of booth properties and/or floor covering at the end of the show should pre-order this service. In the event that excessive booth properties and/or floor covering are abandoned/left on the floor at the conclusion of a move-out, a dumpster fee will be billed to the exhibiting company.

Keeping Up Appearances

Pay close attention to your booth size when ordering items based on booth sq. footage or quantity of decorating items. Please do not order more than what will comfortably fit in your space.

- Exhibitors that order two (2) standard pre-cut carpet pieces should keep in mind that there will be a visible seam where the pieces of carpet are placed together. GES cannot guarantee that carpet colors will be an exact match due to dye lot differences.
- Order just enough carpet to fit your standard booth space. A 10' x 10' booth should not order 10' x 20' carpet.
- We custom cut carpet to fit your needs.

It's All About the Padding

Ordering carpet for your booth? Think about the kind of padding you need if you are going to be on your feet all day. That little extra cushion can make all the difference at the end of the day.

Carpet and Padding: <http://e.ges.com/024600644/carpet/esm>

Electrical Outlets Not Included

Need power for that lamp or arm light in your booth? Electrical outlets must be ordered separately for your booth space through the electrical service provider. Be sure to indicate if the wiring should run under your booth carpet or not.

Electrical Equipment Rental: <http://e.ges.com/024600644/electrical>

Reminder

- Booth Layout is required to process your electrical orders.
- Carefully read the electrical labor rules. Some outlets do not include labor in pricing.

What Goes Up Must Come Down

If labor is needed for your booth space at the time of move-in, you will also need labor for move-out. Remember, what you put up must be taken down.

- See Labor Information form for rules specific to the show. Work rules can vary based on show location.
- Gratuities in any form, including cash, gifts, or labor hours for work not actually performed are prohibited by GES.
- All rates are subject to change if necessitated by increased labor and material costs.
- Pre-order labor to save.

Sensors Expo

San Jose McEnery Convention Center
June 27 - 28, 2018

We are committed to partnering with you to provide comprehensive and effective graphic solutions for your event. The graphics print and production industry continuously evolves, and we want your graphics and images to look their absolute best. To ensure the highest quality output from your digital files, and to make file transfers as seamless as possible, please review and follow these guidelines when submitting artwork to GES. We also offer layout and design services for a fee. Please contact GES for details.

- Save money by providing your artwork/graphic files in the recommended formats.
- Send your graphics early with client name, show name, and booth number to avoid costly delays.
- Do not copy graphics from web pages as they will be low resolution and not suitable for your exhibit/sign.

Graphics

- Avoid setting type in Photoshop - instead use a vector-based program (such as Adobe Illustrator) for your type. If you do use vector smart objects, save the file as an.eps or .psd to retain vector properties.
- If you plan to add effects to your type (such as drop shadows or glows), follow these steps:
 - a. Import the Illustrator type into Photoshop
 - b. Add effects to the type
 - c. Separate the effects onto a layer
 - d. Delete the type layer
 - e. Assemble the type and photo in a vector program
- Always provide logos in a vector format.
- If you have critical PMS colors to match, provide us with a layered Photoshop file to allow for color editing.
- Use gradients carefully and sparingly. Gradients often "band," and little can be done to correct the problem. Look at your high res file at 100% if you can see the banding, it WILL appear in the print. Adding 1 pt. of noise to the file may resolve the problem.

Suitable programs for images or logos:

- Adobe Illustrator CC 2018 - .ai, .pdf, .eps
- Adobe InDesign CC 2018 - .indd, .pdf
- Adobe Photoshop CC 2018 - .pdf, .tiff, .jpeg
- Adobe Acrobat

Color

If your Vector artwork needs to be color specific, please set up your files using the Pantone color pallet. Some Pantone colors are more likely to be achieved than others, we will match all Pantone colors to the best possible interpretation. We do our best to match any physical print sample, however, the colors may deviate slightly due to the limitations within the print process.

If providing colors as CMYK, please set colors as spot. Spot Colors are colors that have been specifically labeled within design software so that RIP Stations can recognize them. Setting colors to "Spot" it enables the RIP Station to adjust the colors independently of the design software to maximize work flow.

Vector Artwork

For the best quality, create graphics in vector format (AI, EPS). Logos taken from websites are generally GIF files, and those are not acceptable as they will not print clearly. Artwork produced for contour cut decals, such as solid company logos or text, must be supplied in a vector format (AI or vector EPS). Artwork created in a pixel format (TIF, JPG) is not compatible with equipment.

preferred* AI/EPS (vector)

GIF, TIFF, JPEG (raster)

Bitmap/Raster Artwork

TIF, JPEG, PDF and PSD - These are the preferred file formats for raster images. Files should be supplied at 100dpi at full size, or they should scale to those dimensions. If the resolution is lower than 100dpi, images can look blurry or pixelated when printed. If there is a lot of small text in the raster image, the file can be provided at higher resolutions to ensure print quality. Files obtained from the internet (JPG, GIF, PNG) or artwork created in MS Office applications (Word, Excel, PowerPoint, etc.) are often not suitable for high quality output for large/grand sized graphics or signage.

Order graphics and **upload artwork files** directly online: <https://e.ges.com/024600644/signs/esm>

Make sure your file(s) are labeled with the exhibiting company's name, the show name and the booth number
(e.g. ABC Company_SHOW_Booth 1234.zip)

Text

Turn all fonts to outlines or convert to paths before sending the files. If you are using a program where this is not an option, **YOU MUST INCLUDE ALL FONTS** with your files. OTF (open type fonts) are preferred.

Editable Text

Outlined Text - preferred*

Final Print package should contain:

- Consistent color pallets in all files (if providing colors as CMYK, please set colors as spot)
- All fonts converted to outlines and/or the fonts used
- Embedded images and/or linked images
- Final art at 100ppi at 100% scale (or an accurate aspect ratio with supporting resolution) Mandatory ZIP or SIT compression

Allow for Frames & Finishing

Some graphics are held in frames. Place all type and critical images at least 1" from all edges to avoid being covered by frames.

For graphics that are held in railroad bases, please place all type and critical images at least 6" from the base to avoid being covered.

Freight Carriers

Select a carrier with experience in handling exhibition materials. Make sure to give your carrier explicit information as to where and when to check in. Delivery and pick up times are often out of the range of normal delivery hours; make sure your carrier is committed to meeting your target dates and times. While making shipping plans to the show, also plan for the return shipment.

Tracking Shipments

Confirm your delivery date and time with your carrier, and have all pertinent shipping information in the hands of your representative at show site. You may also want to review the return of your goods at the end of the show. GES Logistics domestic shipments can be tracked online by going to:

Estimating Material Handling Charges

Handling charges are based on the weight of the freight. Shipments are billed by the hundred weight and rounded up to the nearest hundred. Minimum per shipment may apply, see enclosed Material Handling/Drayage Order Form for details. Please prepay all shipping charges - GES cannot accept or be responsible for collect shipments. Crated and uncrated shipments must be separated and clearly identified on separate bills of lading with separate weight tickets; otherwise, GES will invoice the entire load at the uncrated rate.

- Crated - Material that is skidded, or is in any type of shipping container that can be unloaded at the dock with no additional handling required.
- Uncrated - Material that is shipped loose or pad-wrapped, and/or unskidded machinery without proper lifting bars or hooks.
- Special Handling - Defined as shipments that are loaded by cubic space and/or packed in such a manner as to require special handling, such as ground loading, side door loading, constricted space loading and designated piece loading or stacked shipments. Also included are mixed shipments and shipments without proper delivery receipts.
- Overtime Surcharges - Shows that move-in or move-out on weekends or after 5:00 PM during the weekday, may be subject to additional overtime surcharges. See enclosed Material Handling/Drayage Order Form for details.

Late Surcharges - May be charged an additional overtime surcharge

- If advance freight is received before or after the published deadline date for shipments to arrive at the warehouse. See enclosed Material Handling/Drayage Order Form for details.
- Freight shipments sent to the show after it has opened.
- Freight shipments that are received at show site that do not meet their published date and time.
- Shipment Surcharges - A surcharge will be incurred per shipment for those that are received with incomplete information on shipping labels identifying company name and booth number and/or shipments that are left on the show floor at the end of the show with no labels and no bill of lading turned in.

Machinery Labor and Equipment

Labor and equipment for uncrating, unskidding, positioning, leveling, dismantling, rekrating, and reskidding machinery and/or equipment must be ordered separately. Place your order for this labor using the Forklift Labor Order Form. If your material requires specialized rigging equipment, please notify us promptly so that we can make arrangements. When possible, supply your own rigging equipment with shipments and pre-rig your material.

Storing Empty Containers

Properly labeled empty shipping cartons will be picked up, stored, and returned after the show. Labels are available at the GES Servicenter® or from your GES Service Executive and are for empty storage only. Depending on the size of the show, it can take from two to twelve hours to return empty crates. Do not store any items in crates marked "empty." GES has no liability for damage to crates or items sent to empty storage in crates.

Outgoing Shipments

An OMHF (Outbound Material Handling Form / Bill of Lading) must accompany all outgoing shipments. Shipping information, outbound forms and labels will be available at the GES Servicenter®. Exhibitors selecting non-official carriers will need to make their own arrangements for pickup. Make sure that someone from your company will be on-site to oversee the outbound shipment of your display and product.

1. GES Electrical Jurisdiction (Requires labor and/or material) – All distribution of electrical wiring. All facility overhead and floor distribution of electrical wiring. All materials for floor distribution must be supplied by GES Electrical. All motor and equipment hook-ups requiring hard wiring connections. Installation and/or repair of electrical fixtures. Installation of electrical motors and electrical apparatus to be energized.
2. Total combined wattage within booth space exceeding 20 amps will require electrical booth work labor. Labor is required to inspect and hook-up equipment pre-wired to plug into our systems. Exhibitors are not permitted to use power unless ordered. Exhibitors found using outlets without an order will be subject to the regular rate for outlets used. Sharing power or plugging into facility outlets is strictly prohibited.
3. No outside/external additional power sources are allowed. All show power must be provided by the official Electrical Service Contractor unless special approval is provided.
4. Electrical requirements for an exhibit at all convention facilities are for the safety of all Exhibitors and are based on national electrical codes and local ordinances. Too frequently, fires have been traceable to faulty wiring, sometimes because of carelessness and sometimes because of lack of understanding the risks involved. If an Exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to the convention facilities.
5. Serious risks are involved, which can be eliminated by understanding basic requirements of safe wiring inside your booth. For the safety of you and the public and to avoid code violations, remember these points:
 - All wiring must have a 3-wire grounded cord with a minimum of #14 gauge.
 - Spot or flood lighting is a hazard when lamps are too close to fabrics or other material which can be affected by heat.
 - Cube taps and multi-headed extension cords are not allowed.
 - The use of clip-on sign sockets, latex, or lamp cord wire in displays, or the use of 2-wire clamp on fixtures, is prohibited by order of fire prevention bureaus at trade shows and conventions.
 - Zip cords or two-wire cords are ungrounded and could result in safety hazards. Their use is forbidden in all convention facilities. Please leave all 2-wire cords at home.
 - Exhibitor is responsible for providing surge protectors for their goods. Daisy chaining of power strips is not allowed. GES is not responsible for loss or damage resulting from power surges. Furthermore, GES' liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less.
 - You may pre-wire your equipment to match our receptacles. Any other modifications are not accepted. Here is a list of the plugs that match our equipment receptacles:
 - 5 amp 120 volt: Standard U-ground cord cap
 - 20 amp 208 volt 1phase or 3phase: Leviton 3521 or Hubbell 3521
 - 60 amp 208 volt 1phase or 3phase: Daniel Woodhead Plug Y560P
 - 100 amp 208 volt 1phase or 3phase: Litton-Veam Plug CIR01GRH
6. In the interest of public safety, exhibits at all convention facilities may be inspected to determine if any violations exist. If they are found, qualified electricians are available to correct the problems. This work will be performed on a time and materials basis. If the Exhibitor does not wish to have the fault corrected, electrical service to the offending booth will not be connected. A fee of \$300.00 may be assessed for the safety and rules violation.

7. GES is not responsible for voltage fluctuation or power failure due to temporary conditions. Exhibitor is responsible for providing surge protectors for their Goods. GES is not responsible for loss or damage resulting from power surges. Furthermore, GES' liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less. All electrical installations and connections to all electrical service should be made by a GES electrician. GES will not be responsible for any damage or loss to any equipment, component, computer hardware or software, and/or any damage or bodily injury to any person caused by installation, connection, or plugging in of any electrical outlet by persons other than a GES Electrician.

**Reminder:**

- Check rating plates on your equipment to ensure that you will have the proper power to operate your display.
- Order 24 hour power if required for refrigeration, computer systems, water pumps, heaters, etc.

Electrical Services Frequently Asked Questions

All orders are governed by the GES Payment Policy and GES Terms & Conditions of Contract as specified in this Exhibitor Services Manual.

Sensors Expo

San Jose McEnery Convention Center

June 27 - 28, 2018

How do I know how much power I need?

First, gather a list of all electrical equipment to be powered on in your booth. Consider some of the following elements: lighting, computer equipment, plasmas, company products, AV equipment, and lead retrieval machine. Next, you will want to notate where in your booth space the items will be placed and retrieve the power required for each item. The power voltage/wattage/amperage can be found on the equipment tag located in the back of the item. Typically most items require 110/120 volt power. Machinery leans more towards the 208 or 480 volt power ordered either in single phase or 3 phase. Now you can start calculating how power will be required in each area in your booth space. Start by combining the wattage for the 110/120 volt devices in each area and select an outlet that meets or exceeds this total. It is safer to slightly overestimate your power requirements to help minimize tripping or outages. You must order separate outlets for each electrical apparatus with a minimum of 5 amp at each location.

120 Volt Single Phase
60 Cycle
1000 Watts

230 volts
30 Amps
3 Phase

Is this price listed for power per day?

No, the prices listed on the Electrical Outlets Price List are for the duration of the show.

Where does the power come from?

The power sources come from different areas depending on the halls. Halls may have catwalks available which means the power will drop from the ceiling. In other halls, the power comes from the columns or floor ports placed throughout the exhibit hall meaning the power is run along the floor (380 volt/480 volt power must be run overhead for safety reasons. Additional costs apply.) For the outdoor lots, power is pulled from either the building, generator, or alternate source and run along the floor. No outside/external additional power sources are allowed. All show power must be provided by the official Electrical Service Contractor unless special approval is provided.

Where will my power be located?

For inline and peninsula booths, you will find your power located on the back side of your booth space. Island/Pavilion booth exhibits will need to submit a diagram indicating where your main power source needs to start from. If GES Electrical does not receive this information, the power will be installed in the center of your booth. Any movements of the main power source after installation will be chargeable on time and materials basis. The first ninety feet of cabling to deliver power to your booth is free. If additional cabling is necessary to power your booth, it will be charged on material and motorized equipment basis. If additional cabling is necessary to power your booth, it will be charged on time, material, and motorized equipment basis. In the following diagrams, the symbol represents the approximate location of power outlets. Main Drop Locations must be indicated on the floor plan as MDL. For Island or Pavilion booths, you need to designate one location for each outlet you order. Multiple outlet locations will be charged on a time, equipment and material basis.

Inline Booths

Peninsula Booths

Back-to-Back Peninsula Booths

Island/Pavillion Booths

One drop will be provided within the booth when power source is in the ceiling or one location on perimeter when power is in the floor.

What is a Main Drop Location (MDL)/Additional Drop?

MDL is the main power source located in your booth. Power is then distributed from this point. If you do not want cords run on the floor throughout your booth, you may choose to request additional drops within your booth space billed on time, equipment, and material basis. The location of the main drop should be placed in area that can either be hid or kept out of sight (i.e. closet or storage area).

How many places do I have to plug into?

You will have two connection points to plug into. Power strips can provide additional sockets, but keep in mind the power you have reserved for your booth space. Additional sockets do not mean additional power. Power strips are designed to trip at 1500 watts/15 amps. Use of the power strip on a 2000 watt outlet location will drop the use in that location to 1500 watts/15 amps. All orders exceeding 120 volts/20 amps provide one connection point only. They cannot accommodate power strips and require labor.

Do I need 24 hour power?

If you have equipment that requires power service to be on throughout the entire show (i.e. refrigerators, programmable equipment), we would recommend ordering 24 hr services. Power is turned on ½ hour before the show opens and turned off ½ hour after the show closes.

When will my power be turned on during move-in?

Every attempt is made to have power installed by the end of day on exhibitor's assigned target date. Freight hold areas (typically by freight doors) are done as space becomes available. Any special requests should be communicated to the GES Electrical Department pre-show. Once on-site, please visit the GES Electrical Service Desk.

Why are the power outlet rates for the outdoor lots higher?

The rates are higher than indoor rates because the outdoor lots have minimal available power source locations. The cost is inclusive of getting power to multiple strategic power source locations in the lots. Getting the power from these locations to your booth is chargeable on a time and material basis, outside of the first ninety feet of cabling that is free. This may include cables, ramps, transformers, etc.

Do I need lighting?

Full facility lights will be turned on during show hours; however, some exhibitors choose to enhance the look of their booth or product by directing light to these areas. GES Electrical has different lighting options available. Contact GES Electrical department pre-show for suggestions and recommendations.

Can I hang my own lights?

Exhibitors (not EAC's) may hang up to four (4) arm lights per total booth space as long as the power does not exceed 2000 watts/20 amps.

Do I need to order power for the lighting I use in my booth?

Power needs to be ordered for any lights brought in by an exhibitor or EAC. Power is included for lights ordered on the Lighting Order Form. Power is not included for lights ordered on the Standard Exhibit Systems and must be ordered separately.

How do I know if I need to order labor?

Referencing the Show Site Work Rules, for safety and liability reasons, GES Electrical is required to provide distribution of all electrical wiring from the main power source (MDL) and to other power locations in your booth typically run under carpet; this is considered Floor Work labor. A good rule of thumb for estimating your floor work labor is three extension cords per hour. You may also reference previous GES Electrical invoices. Any connection of an electrical apparatus in your booth space exceeding total combined wattage of a 2000 watt/20 amp service must also be performed by electricians. This includes, but not limited to, hook-up of electrical equipment, distribution above carpet, installation of lights, monitors, hanging signs, and electrical booth structures; this is considered Booth Work labor. Both types of labor can be ordered on the Electrical Labor Order Form. Accurate estimates can help avoid additional show site labor for unscheduled returns/Go Backs. Additional electricians are billed at showsite rates. Exhibitors are responsible for managing the labor. Please notify the service desk immediately if you are not satisfied with the labor for any reason. Dismantle labor is calculated at 50% of the installation time and is based on the date and time the show closes and move-out time frames (overtime rates may apply); this is an automatic charge and does not need to be scheduled. If the nature of your booth requires specific dismantle requests, please advise GES Electrical service desk. Equipment used for dismantle is billed at one (1) hour minimum. Labor orders submitted for Floor Work – Exhibitor Supervised and Booth work must provide date and time. GES Electrical does not accept will calls. This is not considered a complete order. Regular or show site rates may apply. Floor Work – GES Electrical Supervised does not require a date and time as this labor will be performed and completed prior to your arrival, dependent on receiving power, floor plan and payment.

Do I need to order labor to hang my lights?

Referencing the Electrical Outlets Order Form for GES Electrical lights: For inline and peninsula booths that require placement in the back of the booth, labor is included in the price of the lights. For peninsula and island booths that require placement away from the main power source and throughout the booth space, exhibitors are required to order labor. Keep in mind, depending on location and height, equipment may be required and billed accordingly. Typically, lights hung over 12ft require a scissor lift. Equipment rental is recommended for expediting larger quantities of light. If the lights are exhibitor owned, outside of the four (4) arm light rule, a labor order is required. If the lights are EAC owned, a labor order is required.

What if I want to use my own cords and plug strips?

Exhibitors may use their own extension cords and power strips under the regulations provided on the Electrical Safety and Regulations form (to be used over carpet only and not exposed to attendee foot traffic). Be sure to advise the electricians working in your booth that you have brought your own materials. All materials under the carpet must be supplied by GES Electrical for safety reasons.

What is an electrical floor plan and why do I need one?

A floor plan provides the electricians with the necessary information to perform the work requested in your booth space. A floor plan must have the following components: must be scaled, have orientation (call out the surrounding booths in accordance to front/back/sides in your booth), Main Drop Location (MDL), and power distribution points (provide specific measurements of these locations). GES Electrical must also receive an electrical floor plan for placements of the 1000 watt overhead lights.

How can I ensure that I receive the discount rates on my electrical order?

Be sure to submit the following by the electrical discount deadline date:

- Complete valid Payment and Credit Card Authorization.
- Order Electrical Outlets
- Schedule Electrical Labor if distribution is required or for the hook up of electrical apparatus.
- Return complete Booth Layout Form. Prefer submission in PDF or CAD form.

All of the items listed above must be received on or before the discount deadline date in order to receive the discount rates. If one item is incomplete or missing, the order is considered incomplete and the outlet rates will be placed at regular rates and the labor rates will be based on when a complete order is received. Common examples of incomplete orders are (but not limited to) unreadable floor plans, will call (missing date/time), bulk power, no main drop location, and power/floor plan revisions. If you have any questions or concerns, please contact us.

How do I know if my Hanging Sign is Electrical?

Your sign is electrical if it requires electricity, requires a hoist or rotator, or exceeds 300lbs. Hanging Signs require lift equipment to reach the ceiling and must be ordered on the Hanging Sign Order Form. Hanging Sign must be received at the advanced warehouse and the order and payment to GES Electrical office by the discount deadline date.

Step 3. Schedule Plumbing Labor for Exhibitor Supervised Labor

Installation

Start time can be guaranteed only when labor is requested for the start of the working day at 8:00 AM. All exhibit labor for 8:00 AM start times will be dispatched to booth space. Confirm labor and equipment by 2:30 PM the day before date requested. Upon completion, the Exhibitor's representative will return the crew to the labor desk and approve the work order. Equipment and labor cancelled without a 24 hour notice shall be charged a one (1) hour cancellation fee per worker and equipment. If Exhibitor fails to use the workers and equipment at the time confirmed, a one (1) hour "No-Show" charge per worker and equipment will apply.

The minimum charge for labor is one (1) hour per worker for both installation, removal, and equipment. Labor thereafter is charged in half (½) hour increments per worker and equipment.

Please estimate the number of workers and hours per worker needed for installation. Invoice will be calculated according to actual hours worked, relative to the original estimate and based upon the date received. Additional labor required will be calculated and invoiced at the show site rate. Exhibitors requiring plumbing installation labor will automatically be charged a dismantle fee. Dismantle labor is charged at 50% of installation labor based on show close/move-out days/time (overtime rates may apply), and does not need to be scheduled. If plumbers are required in booth at a specific time for dismantle, please notify the GES Electrical Service Desk at the show.

Gratuities in any form, including cash, gifts, or labor hours for work not actually performed are prohibited by GES. GES requires the highest standards of integrity from all employees. Please call our confidential Always Honest hotline at 866.225.8230 to report fraudulent or unethical behavior. All rates are subject to change if necessitated by increased labor and material costs.

Attention:

- **This form must be completed by the EAC.**

The undersigned Exhibitor Appointed Contractor (EAC) has been designated by an exhibitor to perform certain services for the exhibitor at the above referenced show. In consideration of the show organizer and GES permitting the EAC to perform such services at the show, the EAC and GES hereby agree as follows:

Rules and Regulations

- EAC agrees to comply with all rules and regulations of the show as outlined in this agreement, the Exhibitor Services Manual, including all union rules and regulations, and accept liability for any negligent actions.
- EAC agrees that it must ascertain and comply with all rules and regulations of the venue, Show Management, and/or the Official Service Provider in order to create a safe work environment. A failure to do so can result in a delay or termination of your right to continue work if the condition cannot be corrected.
- EAC agrees that the show site, dock and surrounding areas are active work zones and the EAC, its agents, employees and representatives are present at their own risk. Entry into the dock area is prohibited.
- EAC must have all business licenses and permits required by the State and City governments and the convention facility management prior to commencing work. A certificate of insurance naming GES as an additional insured with appropriate insurance limits prepared by the EAC's insurance agent must be submitted to GES at least 30 days prior to the first date of move-in.
- This Agreement and Rules and Regulations between GES and EAC must be completed by an authorized representative of EAC and returned to GES before the deadline noted above.
- If the EAC fails to provide the documentation required in paragraphs 4 and 5 above, the exhibitor will be required to use GES for such services at the prevailing rates set forth in the Exhibitor Services Manual.
- EAC shall provide, if requested, evidence to Global Experience Specialists, Inc. (GES) that it possesses applicable and current labor contracts and must comply with all labor agreements and practices. The EAC must not commit or allow to be committed by persons in its employment any acts that could lead to work stoppages, strikes or labor problems.
- EAC will be responsible for all reasonable costs related to its operation, including overtime pay for stewards, restoration of exhibit space to its initial condition, etc. Where applicable a one hour minimum labor charge will be charged at the appropriate steward rate of pay per day/per union to either the EAC/exhibitor depending upon the billing arrangement set up with GES (based upon EAC not number of booths).
- The show aisles and public spaces are not part of the exhibitor's booth. Therefore, EAC is required to confine all activities to the exhibit space of the exhibitor who has given a valid order for services. Exhibitors may be charged for costs related to movement of its property if the EAC does not contain its operations within the confines of the booth. No service desks, storage areas or other work facilities will be located anywhere in the building. The show aisles and public space are not a part of the exhibitor's booth space and must be kept clear at all times.
- During show hours, only EACs with exhibit badges will be permitted on the exhibit floor. No EAC will be permitted on the exhibit floor during show hours without the proper Convention name badge supplied by the exhibiting company. EAC must furnish Show Management and GES with the names of all on-site employees who will be working on the show floor and ensure that they have and wear identification badges at all times necessary as determined by Show Management.
- EAC has attached herewith certificates of insurance confirming the following required insurance:
 - Commercial General Liability, including contractual liability, with limits of not less than \$1,000,000 each occurrence, \$2,000,000 general aggregate and \$2,000,000 products & completed operations aggregate.
 - Automobile Liability with a limit of not less than \$1,000,000 combined single limit - each accident. All owned, hired and non-owned boxes marked.
 - Workers Compensation, as required by law, with Employers Liability Limits of not less than \$1,000,000 each accident, \$1,000,000 disease - each employee and \$1,000,000 disease - policy limit.

(GES) (Official Service Provider), Questex Media Group (Show Management), Sensors Expo (Show) and San Jose McEnery Convention Center (Facility) as additional insureds on a primary and non-contributory basis per the attached sample certificate of insurance. Umbrella follows form.
- EAC agrees to indemnify, defend and hold the Show Management, the Facility and Global Experience Specialists, Inc. (GES) harmless from and against any and all claims, lawsuits, demands, liability, costs and expenses, including reasonable attorney's fees and court costs, arising out of EAC's operations, including supervision of GES provided labor. EAC also agrees to reimburse GES for all attorney's fees and costs incurred in connection with any and all claims, lawsuits and counterclaims that should arise out of EAC's failure to adhere to the terms of this agreement.
- Solicitation of business on the show floor is strictly prohibited. If EAC attempts to provide services designated to another party as "exclusive" or is discovered soliciting on the show floor including the distribution of official company literature, or otherwise does not comply with the rules, the company may be removed from the show floor, and the exhibitor will not be able to use that company for the remainder of the event.
- EAC/ exhibitor may not move freight from one booth to another booth, or to meeting rooms. GES must provide labor.
- EAC must coordinate all of its activities with Global Experience Specialists, Inc. (GES).

Rules and Regulations (continued)

17. The exhibitor or its EAC should take steps to protect the exhibitor and the EAC's product in the booth by arranging for booth security and/or cages. GES is not responsible for items left unattended on the show floor.
18. EAC agrees GES is not responsible for any items stored in empty containers. Do not store empty cartons inside of empty crates. Cartons are returned from storage before crates so exhibitors may begin packing their product.
19. EAC/exhibitor agrees to keep "No Freight Aisles" clear at all times. If GES is required to rearrange any material situated in a clearly identified "No Freight Aisle," the exhibitor or the EAC depending upon the billing arrangements with GES will be charged a one hour minimum for forklift rental and labor.
20. EAC/exhibitor agrees that all outbound freight bills should be turned into the service desk on a timely basis. Holding freight bills until late in the day or turning in large amounts of freight bills to the GES Servicenter at one time may delay outbound truck scheduling and subsequently force your loading out into overtime.
21. During tear down, pull all manageable structures back from aisle carpet lines. Electronics, mannequins, etc. should be placed in the center of the booth.
22. Be aware of vehicle traffic inside and outside of the facility. All attendees should be aware of their surroundings and all individuals are solely responsible for their own safety in parking lots, driveways, access roads and non-exhibit hall areas.
23. Label empty cartons and crates for storage as soon as they are ready. Holding back on "empties" only adds congestion to the aisles.
24. For services such as electrical, plumbing, telephone, cleaning and drayage, no service provider other than the Official Service Provider will be approved. This regulation is necessary due to licensing, insurance and work done on equipment and facilities owned by parties other than the exhibitor. Exhibitors shall provide only the material and equipment they own and those materials are to be used only in their exhibit space.
25. Smoking is prohibited in most facilities. Smoking shall only be allowed in designated areas.
26. This agreement is to be interpreted under the laws of the State of Nevada.
27. A faxed signature will serve as an original signature and will stand as a fully executed agreement once faxed to and received by GES.

Union Information

To assist you in planning your participation in your show, we are certain you will appreciate knowing in advance that union labor will be required for certain aspects of your exhibit handling.

Decorators Union Jurisdiction

Union jurisdictions prevail over all set-up and dismantling of exhibits including signs and laying of carpet. This does not apply to the unpacking and placement of your merchandise. Any installation of exhibits or displays which requires the use of hand tools, or more than one person, or longer than thirty minutes (including crating and uncrating) to install, or exceeds ten feet in any direction, shall be installed by employees covered by this Agreement. One full-time company employee may supervise work with the Union crew.

Material Handling Union Jurisdictions

Union jurisdictions prevail over the operation of all material handling equipment, all unloading and reloading, and handling of empty containers. An exhibitor may move material that can be hand-carried by one person in one trip without the use of dollies, hand trucks, or other mechanical equipment.

Electricians Union - Truss and Lighting

TSE is responsible for supervision, assembly and removal of truss assemblies for lighting, audio-visual equipment & special effects, whether hanging or floor standing. All power, electrical labor orders, and additional requirements for such equipment must be placed through TSE as the electrical contractor. Your representative may be present during the assembly or the installation / removal of your truss or lighting.

Sensors Expo

San Jose McEnery Convention Center
June 27 - 28, 2018

The following guidelines have been instituted by County Convention Facilities in order to ensure the safe operation of any convention or trade show in these facilities. Please cooperate in abiding by these regulations.

1. The use of the following materials, processes and equipment are prohibited.

Liquid petroleum gas [Ref. SFFC Article 82]
Gas operated cooking equipment
Cellulose Nitrate Motion Picture Film
Wood matches with all-surface strikes
Portable heating equipment
Flammable cryogenic gases
Overnight sleeping
Aerosol cans with flammable propellants
Glitter
Smoking in posted "No Smoking" areas
Stick-on decals
Fueling of motor vehicles
Helium balloons
Pressurized gas tanks, empty or full

NOTE: Oilpaper, tarpaper, sisal paper, nylon, orlon, and certain other plastic materials cannot be made flame-retardant, and their use is prohibited.

2. Combustion Engines: any autos, trucks, motorcycles, boats, other motorized vehicles or other flammable fueled engines displayed shall conform to the following requirements:
 - a. Fuel tanks, unless never having held fuel, shall be maintained with a quantity not to exceed one quarter of tank capacity or five gallons, whichever is less. Caps for fuel tank fill pipes shall be of the locking type and be maintained locked and sealed in an approved manner to prevent the escape of vapors. No vehicle may be started or operated within any assembly building during show hours. This shall include garden tractors, chain saws, power plants, and other gasoline-powered equipment. Adding or removing fuel, on site, shall be prohibited. LPG fuel tanks shall be removed. Vehicles shall not be moved during show.
 - b. The electrical system shall be de-energized, either by:
 1. Removing the battery(ies); or
 2. Removing the battery cables; or
 3. Disconnecting both battery cables and covering them with electrical tape or other similar insulating material to prevent arcing.
3. Exhibits shall be installed so as not to block emergency equipment, fire exits and equipment, including fire hose and hand fire extinguisher cabinets and fire pull boxes. Exhibits shall be installed so as not to interfere in way with access to or visibility of any required exit or exit sign.
4. All aisle and display areas shall be free of obstruction.
5. The following booth configurations require special approval:
 - a. Platforms exceeding 500 square feet in area (No combustible storage is permitted under platforms)
 - b. Exhibition booths with canopies
 - c. Single level covered exhibition booths
 - d. Booths/exhibits of a height exceeding 12'
 - e. Booths and other structures, constructed within a building equipped with an automatic sprinkler system, shall not be constructed with any roof, ceiling, or other enclosure which would prevent the sprinkler system from protecting the booth area.

6. The following provisions shall be applicable to all shows and/or exhibits:

- a. All decorative materials, or other combustible materials shall be made from a nonflammable material or shall be treated and maintained in a flame-retardant condition by means of a flame-retarding process approved by the Fire Department and/or the office of the State Fire Marshal.
- b. Treatments must be renewed as necessary or after cleaning. All treated materials or items must have a tag affixed (or a sign displayed in the booth) showing the date and type of treatment and the name of the firm which applied the treatment.

EXCEPTIONS:

1. Plywood or factory flame proofed cardboard is acceptable.
2. Tables may be covered with ordinary paper products if the material is attached flat against the table with no overhang.
3. Objects on display, such as arts or crafts, are not required to be flame retardant.

As a general rule, a material is not flame retardant if, after being ignited, the material continues to burn after the igniting flame has been removed.

7. If your equipment is flammable, you can either not use it and buy new material that is flame resistant from a company with a California Flame Retardant Certificate, or simply get it treated by a company licensed by the state of California, obtaining a Flame Retardant Certificate at that time. Only California Certificates will be accepted, and they must be prominently attached to the material used so they may be easily seen by the Fire Marshal. This does not apply to your product or any decorations provided by the official decorator. Self treatment of materials is not allowed.
8. All electrical devices shall meet the following qualifications:
 - a. All electrical equipment, cords, extensions, etc., must be Underwriters Laboratories (UL) approved, and shall meet all city and state codes.
 - b. Flexible extension cords must be of adequate size and type for the equipment/appliances used. These extensions must be of the 3-prong, grounded type.
 - c. Clamp-on types of portable spotlights shall be protected from metal-to-metal contact by having electrical insulating pads or wrapping permanently attached to the lamp holder clamp. Use of ceramic porcelain or molded composition type of neck-shell is the only type approved for use in San Jose Convention Facilities. On/off switches are usually located in the neck.
9. Literature on display shall be limited to reasonable quantities (1 day's supply). Reserve quantities shall be kept in closed containers and stored in a neat and compact manner, free and clear of electrical cables or junction boxes.

Since most crates and cartons are not constructed of non-flame resistant wood and packing materials are not flame retardant, storage of these items are not permitted within Convention Facilities. Storage of any kind is prohibited behind the back drapes or display wall, or inside display area.

All cartons, crates, containers, packing materials, etc., which are necessary for repacking shall be labeled with "EMPTY" stickers and removed from the floor.
