

### HELPFUL HINTS

- Borrowing power from an adjoining booth is NOT permitted. Sharing your neighbour's power may overload the circuit.
- All equipment must be approved for use by a recognized certification agency (i.e. CSA, ULC). Approval markings can be found on the rating nameplate located on the back or bottom of the equipment.
- Check the equipment rating nameplate on the bottom or back of your equipment to determine your total electrical needs.
- Order 24-hour outlets if you require your power to remain energized overnight (i.e. for refrigerators, freezers, fish tanks, etc).
- All equipment must have a 3-wire grounded cord, minimum of #14 gauge wire.
- A Ground Fault Circuit Interrupter (GFI) must protect all 120 volt electrical equipment/devices within 6 feet of a water/liquid source.
