

# Temporary Hand Washing Station

- **Liquid soap**
- **Paper towels**
- **Container with a spigot that provides a continuous flow of running water**
- **Table**
- **Bucket for waste water**

A temporary hand washing station shall consist of a container with a spigot that provides a continuous flow of running water, liquid soap, paper towels, and a bucket to collect waste water. The temporary hand washing station must be set up on a table.

Any booth without a hand washing station will not be allowed to operate.

Hand sanitizers do not replace the requirements for a temporary hand washing station. Hand sanitizers should only be used by non-food handlers such as cashiers, garbage and maintenance staff.
