

SHOW SITE WORK RULES

UNION INFORMATION

To assist you in planning your participation at MAGIC we are certain you will appreciate knowing in advance that you will be required to use union labor to perform the following activities relating to your exhibit:

FREIGHT HANDLING & TRANSPORTATION

Teamsters will handle the loading and unloading of freight from all trucks, trailers, and common or contract carriers as well as the handling of empty crates and the operation of material handling equipment. Teamsters will also handle the unloading, uncrating, unskidding, leveling, painting and assembly of all machinery and equipment as well as the reverse process. Global Experience Specialists has been appointed as the exclusive drayage contractor, and is therefore responsible for receiving and handling all material and empty crates, as well as to manage the docks and schedule vehicles for the smooth and efficient move-in / move-out of the show. Global Experience Specialists (GES) will not be responsible for any material it does not handle

An exhibitor may hand carry material in and out of the Show provided that the exhibitor does not use material handling equipment. Please note that hand carrying of materials from the loading dock/freight door areas is prohibited.

ELECTRICIANS

Electricians perform all electrical work, hang electric signs and lighting without dimmers, including without limitation the installation of (i) rotating signs hung from the ceiling or mounted from the floor and powered by a motor; (ii) header signs that are separate from the exhibition booth's main structure and require power; and (iii) teamster-assembled signs weighing 200 lbs or greater. Video monitors and plasma screens are installed by electricians unless a live feed is required. In the case of live feed requirements, Stagehands must perform the work.

Electricians also wire the cables that distribute power from the source to the exhibition booth floor. Electricians must be called for any increase in electrical service or for distribution of power and hook-up in excess of 20A / 120 VAC total booth space and concealed under or over carpet wiring.

Exhibitors may plug-in their equipment into the 1 (one) 20A / 120 VAC receptacle and may hang up to 4 (four) small clip-on lights per total booth space without the use of an Electrician.

Electricians must be utilized to install and dismantle all ground supported, stand alone trusses whose sole purpose is overhead distribution of electrical equipment and suspended trusses, with motorized hoist and non-dimmable and non-programmable lights.

STAGEHANDS

Stagehands handle all programmable theatrical lighting, production, related rigging, and audio-visual. Stagehands are also responsible for installation and removal of suspended trusses with or without legs that contain dimmable or programmable lighting, studio or motion picture lighting, sound system projectors, video wall, special effects equipment, and laser lighting.

Trusses not supporting the type of equipment identified in the previous paragraph can be installed or dismantled by either a Teamster or Electrician.

Stagehand services must be used if Stagehand equipment is used on a ground support truss in a meeting room.

SERVICE CONTRACTORS

Show Management, through a bidding process, selects and appoints certain show and exhibitor service contractors who are permitted to identify themselves as "Authorized Contractors" to the Show. The use of Authorized Contractors at the Show is highly recommended by Show Management. If Exhibitor desires to appoint a contractor other than an Authorized Contractor (an "EAC") to perform I & D Services (as defined below) at the Show, Exhibitor shall be required to certify to Show Management that (I) such EAC is, and as of the Show will be, a party to a collective bargaining agreement with a union labor organization qualified to perform I & D Services at the Show; and (II) all I & D Services performed at the Show for Exhibitor by such EAC shall be performed exclusively by employees who are represented by a Las Vegas-based local of that union. Show Management may receive some economic benefit when Exhibitors use services provided by Authorized Contractors, which may help Show Management defray the overall Show and booth costs. "I & D Services" means all services associated with the erection, touch-up painting, dismantling and repair of exhibits, including, without limitation, the installation, dismantling and/or removal of wall coverings, floor coverings, pipe and drape, hanging of signs and decorative materials, placement of exhibit-related signs and the erection of platforms for exhibit-related purposes.

GRATUITIES

Work rules prohibit the solicitation or acceptance of tips in cash, product or gifts in kind by any employee (union or non-union).
