

WI-FI SERVICE

As a service to all participants of MAGIC, we are providing free Wi-Fi. We have worked with multiple technology vendors to ensure there will be proper bandwidth and coverage available for the event.

In exploring past performance issues around this service, we've discovered that the problems we have encountered are being caused by hotspots set up in the exhibit hall. In fact, our tech team mapped over 700 hotspots on the floor last season! These hotspots cause broadcast interference and shut out access to the Wi-Fi for other users.

Due to the degradation of show-wide Wi-Fi service, the use of a hotspot is not allowed under show rules as it causes the Wi-Fi to become ineffective. We ask that you not set up a hotspot with any of your equipment.

We will have a mapping team on the show floor and if they come across an active hotspot, they will require the owner to shut it down.

If your company needs more access than is readily available via the free Wi-Fi, we suggest you order a hardline drop for your booth. This can be ordered through FestiFi LLC. You can e-mail tonyt@festifi.co to order service or can call (512) 585-0084 for more information.

Please be kind to fellow show participants and help keep free Wi-Fi available for all!

Thank you,

MAGIC Team
