Health Department

Regulations

All booths providing food samples must do so in a clean and sanitary manner. Tongs, single-serving napkins, toothpicks or dispensing units (i.e. cups, etc.) must be used.

- If preparing or serving any food items, hand-washing facilities are required within each booth. Acceptable facilities include a dispenser of warm water with a catch bucket, paper towels and a pump-type soap dispenser.
- Food may not be served from a "common bowl" unless tongs are used to distribute the food. We suggest single-serve cups, toothpicks and single napkins.
- Even if gloves are used, a hand-washing kit is still required. The sole use of a waterless hand sanitizer is not in compliance with health department regulations.
- All perishable foods such as milk, fish, eggs and poultry products must be temperature controlled. Cold foods must be kept at or below 41 degrees Fahrenheit. All potentially hazardous foods must be maintained at or below 41 degrees Fahrenheit or above 135 degrees Fahrenheit at all times.

- All vendors who wish to sample their product must provide protection of open food sampling (i.e. unpackaged crackers, chips, dips, drinks, etc.). All unpackaged foods on display must be protected with a sneeze guard shield or plastic covering that is rigid, semi-permanent, and provides adequate protection that follows the Temporary Food Facility Guidelines. Sneeze guards are available for rent from GES.
- All food samples should display a label with its common name and ingredients.

Per the Health Department's advice, you may be asked to cease sampling operation at your booth if you do not meet the requirements. For several years, sneeze guard protection has been required for the protection of open food sampling. This health code is now being enforced if violated.

Personal Care Product Applications

- Sterilized utensils must be used. A fresh, sterilized cotton ball, spatula, Q-tip or powder puff must be used for each individual application.
- When applying lip applications of any kind, eye shadows, face blushes, etc. a portion of the product must be scraped off with a utensil and applied to the individual with the utensil. The used utensil may not be returned to the pallet. A new, sterilized utensil must be used for each application.
- When using products that are packaged in a container other than a squeeze type container, such as a jar, a sterilized utensil must be used to remove the product from the container. Once the product has been applied to the individual, you may not return the used utensil to the product.

Standards An Exhibitor Standards booklet is available online or upon your request. All Fresh Ideas Exhibitor contracts include a clause requiring compliance with the Exhibitor Standards. A signed exhibitor contract is a binding agreement to comply with Natural Product Expo Exhibitor Standards. Companies exhibiting in the Fresh Ideas Organic Marketplace must submit an Organic Standards Form Prior to the show. Standards Booklet/Forms online at www.newhope.com/standards
