

LOCAL 16 IATSE GUIDELINES AT MOSCONE CENTER

To assist you in avoiding any issues during the setup and operation of audiovisual equipment in your booth, ETS reminds you of the following labor regulations at the Moscone Center.

Important Filming Guidelines at Moscone Convention Center

Exhibitors will be required to hire a representative from Local 16 IATSE if any of the following activities or equipment are scheduled for the exhibit build or to take place during the exhibition.

- Equipment set-up and plug-in for camera operation
- Videotape or hard disk recorders
- Portable lighting, audio, and/or props

Please note the following important points associated with Moscone filming:

- A Local 16 IATSE technician will be required for all video recording and video production.
- A broadcast fee will apply for each technician if the intention of the video recording is for mass broadcast or webcast - including on demand video and web streaming. This fee is a minimum of \$1,000 per day regardless of how long the production is.

Exhibitor Guidelines at the Moscone Convention Center

The following guidelines will aid in defining labor requirements during move in, move out or show days for SEMICON West:

- Local 16 IATSE technicians will be required for all audio/visual setup, dismantle and operation including all projection, audio speakers, monitors, video switching/processing and computers.
- Exhibitors that own minimal audio/visual equipment may set their own gear. Example of minimal A/V set up: a monitor on a table with 2 computers.
- All rented audio/visual equipment requires Local 16 IATSE technicians for set up and dismantle.

Moscone is a union facility as contracted between Moscone Center and Local 16 IATSE. ETS is here to help you to understand these rules and adhere to them at a minimal cost to you while ensuring your booth is set in a timely and efficient manner.

Local 16 IATSE labor can be contracted through ETS by placing an order with an ETS sales representative. To place an order, please contact Lydia McBride at lmcbride@ets-av.com.

For further clarification on labor requirements for any audio visual or filming activities during SEMICON West, please contact exhibits@ets-av.com or +1.972.756.0100.
