

Dust Collection Supplier Information

August 24-27, 2016 Atlanta, Georgia USA
Georgia World Congress Center

The Georgia World Congress Center does not have dust collection systems. It is the responsibility of each exhibitor to provide for their own dust collection. Management reserves the right to restrict the operation of any equipment expelling fly waste that, in the opinion of Management is excessive, hazardous, or interferes with the rights of others. In addition to operating restrictions, Management may also require the installation of special cleaning systems and/or plexi-glass walls or other barriers to prevent fly waste from flowing into the aisles or other booths.

The following companies have available dust collection systems for sale or lease/rental.
Please contact them directly with your requirements.
