

HEALTH AND SAFETY

The health and safety of all participants in World of Asphalt and AGG1 is our top priority, including exhibitors, attendees, educators, vendors, partners, staff, among others. We are committed to hosting the premier asphalt and education event in our industry by bringing asphalt equipment end users together with manufacturers and other industry leaders to explore the latest technology, equipment and education opportunities. We are closely monitoring the evolution of COVID-19 and how it may impact our plans for in-person gathering in Atlanta, March 9-11. We promise to provide clear and updated information as soon as possible. Please check back frequently for the latest information. In order to create safe events for our members, Show Management is:

Following Centers for Disease Control and Prevention (CDC), World Health Organization (WHO) and local guidelines.

We continue to review and apply the evolving guidance from the world's health organizations, experts and local authorities regarding gatherings, meetings and events.

Enhancing Cleaning

We are partnering with the Georgia World Congress Center and vendors to regularly clean and sanitize all commonly used areas. This includes all common touchpoints and high traffic areas, including but not limited to meeting spaces, restrooms, and dining areas.

GBAC STAR™ ACCREDITATION

Georgia World Congress Center has achieved GBAC STAR accreditation for cleaning, disinfection, and infectious disease prevention. GBAC STAR enables facilities to create and maintain an organized, effective approach to work practices, protocols, procedures, and systems to control risks associated with infectious agents, such as SARS-CoV-2, the virus responsible for COVID-19.

Social Distancing

We are coordinating with the Georgia World Congress Center to arrange seating and social arrangements at least 6 feet apart, create safe traffic flow and include ample on-site signage to remind everyone to remain a safe distance apart for in-person gatherings.

Health-Screening

We are directing all staff and participants to stay home if they are ill. Additional screening methods, such as temperature taking, self-screening questionnaires, and advance communication to stay home if ill will be used if applicable.

Issuing Best Practices for Attendees and Exhibitors

We will limit touch points, implement a “no handshake policy”, and share good hygiene practices. Show Management will provide hand sanitizing stations every 200 feet on the show floor and throughout the venue. Show Management will require masks/face coverings for all participants. and we will provide masks as needed. We will continue to monitor the State and local guidance and requirements around face coverings.

Safe Food & Beverage Practices

Show Management will work with the Georgia World Congress Center to provide contactless and pre-packaged food and beverage options. Seating and queueing will be appropriately distanced with plexiglass shields where appropriate.

IN YOUR EXHIBIT SPACE

Show Management encourages exhibitors to follow the safety guidelines below within your exhibit space:

- Practice 6 feet of physical distancing within your space with attendees and colleagues.
- Wear face coverings.
- Provide hand sanitizer in your exhibit space that contains more than 60% ethanol or 70% isopropanol for your staff and visitors' use.
- Wipe down/disinfect equipment and touch points regularly.
- Food and beverage should be prepared and handed out in compliance with GWCC protocols (i.e. with a server, only prepackaged food, etc.)
- If offering handouts and or giveaways, provide separately packaged items.
- Limit touch-points in their booth experience.

In conjunction with the exhibitor package plan, the show floor and exhibits will receive an enhanced sanitization and cleaning each show evening after show hours. There is no extra charge to exhibitors for this higher level of cleaning. During show hours, it is the exhibitors' responsibility to keep their space clean, sanitized and safe.

In addition, GES, the official contractor, will provide 8 foot drape at no extra charge between any exhibit spaces directly next to one another, rather than the 3 foot side drape traditionally used.
