Details Matter When Shipping

Material Handling is the unloading of your exhibit materials. The service includes delivery to your booth, handling of empty containers to and from storage and removal of your materials from your booth for reloading onto your outbound carrier. This is not to be confused with the cost to transport your exhibit material to and from the event.

- Unloading the freight and delivery to your booth is not included. Avoid unexpected costs at show site and estimate the cost for this service. <http://e.ges.com/071601237/item/200500>
- We understand that your calculation is only an estimate. Invoicing will be done from the actual weight. Adjustments will be made accordingly.
- Save by combining shipments. A minimum charge applies for each shipment under 100 lbs.
- Make sure that a Bill of Lading is filled out completely for each shipment.
- Confirm that your driver has the correct dates and times that your shipment needs to be delivered and picked up.
- Use provided shipping labels to make sure show name, booth number and other vital information is provided.

No Tipping

GES work rules prohibit the solicitation or acceptance of tips in cash, products or gifts of any kind by any employee. Our employees are paid appropriate wages denoting professional status; therefore, tipping of any kind is prohibited.

Where Did My Crates Go?

After your exhibit is set-up and your products displayed, you must place "empty" stickers on your empty containers for storage during the show. At show site a kiosk with a floor plan and color coded "empty" stickers will be available. Crews will clear the floor of all "empty" stickered containers to clear room for other freight.

- Simply write your booth number, company and show name on the sticker and place the container in the aisle. It will be stored throughout the exposition and then returned to your booth upon show close.
- Place stickers on all four (4) sides of the crate.
- Please label your empty containers as soon as possible to keep your area clear and make it easier to prepare your booth.

Don't Forget to Take Out the Trash

Exhibitors planning on disposing of booth properties and/or floor covering at the end of the show should pre-order this service. In the event that excessive booth properties and/or floor covering are abandoned/left on the floor at the conclusion of a move-out, a dumpster fee will be billed to the exhibiting company.

Electrical Outlets Not Included

Need power for that lamp or arm light in your booth? Electrical outlets must be ordered separately for your booth space through the electrical service provider. Be sure to indicate if the wiring should run under your booth carpet or not.

Electrical Equipment Rental: <http://e.ges.com/071601237/electrical>

- Booth Layout is required to process your electrical orders.
- Carefully read the electrical labor rules. Some outlets do not include labor in pricing.

What Goes Up Must Come Down

If labor is needed for your booth space at the time of move-in, you will also need labor for move-out. Remember, what you put up must be taken down.

- See Labor Information form for rules specific to the show. Work rules can vary based on show location.
- Gratuities in any form, including cash, gifts, or labor hours for work not actually performed are prohibited by GES.
- All rates are subject to change if necessitated by increased labor and material costs.
- Pre-order labor to save.

AUA 2019 Practice Management Conference

McCormick Place Convention Center, North Building Room N226

May 2 - 3, 2019

We are committed to partnering with you to provide comprehensive and effective graphic solutions for your event. The graphics print and production industry continuously evolves, and we want your graphics and images to look their absolute best. To ensure the highest quality output from your digital files, and to make file transfers as seamless as possible, please review and follow these guidelines when submitting artwork to GES. We also offer layout and design services for a fee. Please contact GES for details.

- Save money by providing your artwork/graphic files in the recommended formats.
- Send your graphics early with client name, show name and booth number to avoid costly delays.
- Do not copy graphics from web pages as they will be low resolution and not suitable for your exhibit/sign.

Graphics

- Avoid setting type in Photoshop - instead use a vector-based program (such as Adobe Illustrator) for your type. If you do use vector smart objects, save the file as an .eps or .psd to retain vector properties.
- If you plan to add effects to your type (such as drop shadows or glows), follow these steps:
 - a. Import the Illustrator type into Photoshop
 - b. Add effects to the type
 - c. Separate the effects onto a layer
 - d. Delete the type layer
 - e. Assemble the type and photo in a vector program
- Always provide logos in a vector format.
- If you have critical PMS colors to match, provide us with a layered Photoshop file to allow for color editing.
- Use gradients carefully and sparingly. Gradients often "band," and little can be done to correct the problem. Look at your high res file at 100% if you can see the banding, it WILL appear in the print. Adding 1 pt. of noise to the file may resolve the problem.

Suitable programs for images or logos:

- Adobe Illustrator CC 2018 - .ai, .pdf, .eps
- Adobe InDesign CC 2018 - .indd, .pdf
- Adobe Photoshop CC 2018 - .pdf, .tiff, .jpeg
- Adobe Acrobat

Color

If your Vector artwork needs to be color specific, please set up your files using the Pantone color pallet. Some Pantone colors are more likely to be achieved than others, we will match all Pantone colors to the best possible interpretation. We do our best to match any physical print sample, however, the colors may deviate slightly due to the limitations within the print process.

If providing colors as CMYK, please set colors as spot. Spot Colors are colors that have been specifically labeled within design software so that RIP Stations can recognize them. Setting colors to "Spot" it enables the RIP Station to adjust the colors independently of the design software to maximize work flow.

Vector Artwork

For the best quality, create graphics in vector format (AI, EPS). Logos taken from websites are generally GIF files, and those are not acceptable as they will not print clearly. Artwork produced for contour cut decals, such as solid company logos or text, must be supplied in a vector format (AI or vector EPS). Artwork created in a pixel format (TIF, JPG) is not compatible with equipment.

preferred* AI/EPS (vector)

GIF, TIFF, JPEG (raster)

Bitmap/Raster Artwork

TIF, JPEG, PDF and PSD - These are the preferred file formats for raster images. Files should be supplied at 100dpi at full size, or they should scale to those dimensions. If the resolution is lower than 100dpi, images can look blurry or pixelated when printed. If there is a lot of small text in the raster image, the file can be provided at higher resolutions to ensure print quality. Files obtained from the internet (JPG, GIF, PNG) or artwork created in MS Office applications (Word, Excel, PowerPoint, etc.) are often not suitable for high quality output for large/grand sized graphics or signage.

Order graphics and **upload artwork files** directly online: <https://e.ges.com/071601237/signs/esm>

Make sure your file(s) are labeled with the exhibiting company's name, the show name and the booth number (e.g. ABC Company_SHOW_Booth 1234.zip)

- Consistent color pallets in all files (if providing colors as CMYK, please set colors as spot)

Estimating Material Handling Charges

Handling charges are based on the weight of the freight. Shipments are billed by the hundred weight and rounded up to the nearest hundred. Minimum per shipment may apply, see enclosed Material Handling/Drayage Order Form for details. Please prepay all shipping charges - GES cannot accept or be responsible for collect shipments. Crated and uncrated shipments must be separated and clearly identified on separate Bills of Lading with separate weight tickets; otherwise, GES will invoice the entire load at the uncrated rate.

- Crated - Material that is skidded, or is in any type of shipping container that can be unloaded at the dock with no additional handling required.
- Uncrated - Material that is shipped loose or pad-wrapped, and/or unskidded machinery without proper lifting bars or hooks.
- Overtime Surcharges - Shows that move-in or move-out on weekends or after 4:30 PM during the weekday may be subject to additional overtime surcharges. See enclosed Material Handling/Drayage Order Form for details.

Late Surcharges - May be charged an additional overtime surcharge

- If advance freight is received before or after the published deadline date for shipments to arrive at the warehouse. See enclosed Material Handling/Drayage Order Form for details.
- Freight shipments sent to the show after it has opened.
- Freight shipments that are received at show site that do not meet their published date and time.
- Shipment Surcharges - A surcharge will be incurred per shipment for those that are received with incomplete information on shipping labels identifying company name and booth number and/or shipments that are left on the show floor at the end of the show with no labels and no Bill of Lading turned in.

Machinery Labor and Equipment

Labor and equipment for uncrating, unskidding, positioning, leveling, dismantling, rekrating, and reskidding machinery and/or equipment must be ordered separately. Place your order for this labor using the Forklift Labor Order Form. If your material requires specialized rigging equipment, please notify us promptly so that we can make arrangements. When possible, supply your own rigging equipment with shipments and pre-rig your material.

Storing Empty Containers

Properly labeled empty shipping cartons will be picked up, stored and returned after the show. Labels are available at the GES Servicenter® or from your GES Service Executive and are for empty storage only. Depending on the size of the show, it can take from two to twelve hours to return empty crates. Do not store any items in crates marked "empty." GES has no liability for damage to crates or items sent to empty storage in crates.

Outgoing Shipments

An OMHF (Outbound Material Handling Form / Bill of Lading) must accompany all outgoing shipments. Shipping information, outbound forms and labels will be available at the GES Servicenter®. Exhibitors selecting non-official carriers will need to make their own arrangements for pickup. Make sure that someone from your company will be on-site to oversee the outbound shipment of your display and product.

Measure of Damage

- Liability - GES is liable for loss or damage to your goods only if the loss or damage is caused by GES negligence.
- Sole Relief - If found liable for any loss, GES' sole and exclusive maximum liability for loss or damage to Customer's goods is limited to \$.50 (USD) per pound with a maximum liability of \$100 (USD) per container, or \$1,500.00 (USD) per shipment, whichever is less.

Insurance

All of your goods should be insured by your own insurance policy. Although we do our best to handle your goods as our own, there are many variables in shipping and handling that can affect your exhibit and products. GES has published GES Terms and Conditions of Contract that are in this exhibitor service manual. Please read them carefully. It is recommended that your goods be insured.

Work Zone

Customer acknowledges that the show site and surrounding areas are active work zones. Customer, its agents, employees and representatives are present at their own risk.

Electrical Code

Electrical requirements for an exhibit at all convention facilities are for the safety of all Exhibitors and are based on national electrical codes and local ordinances.

Too frequently, fires have been traceable to faulty wiring, sometimes because of carelessness and sometimes because of lack of understanding of the risks involved.

In the interest of public safety, exhibits at all convention facilities may be inspected to determine if any violations exist. If they are found, qualified electricians are available to correct the problems. This work will be performed on a time and materials basis. If the Exhibitor does not wish to have the fault corrected, electrical service to the offending booth will not be connected.

If an Exhibitor is not informed or does not understand basic safety standards for electrical wiring, an electrician should be consulted before shipment is made to convention facilities.

Serious risks are involved which can be eliminated by understanding basic requirements of safe wiring inside your booth. For the safety of you and the public, remember these points:

- All wiring must have a 3-wire grounded cord with a minimum of #14 gauge.
- Spot or flood lighting is a hazard when lamps are too close to fabrics or other material which can be affected by heat.
- The use of clip-on sign sockets, latex, or lamp cord wire in displays, or the use of 2-wire clamp on fixtures, is prohibited by order of fire prevention bureaus at trade shows and conventions.
- Zip cords or two-wire cords are ungrounded and could result in safety hazards. Their use is forbidden in all convention facilities. Please leave all 2-wire cords at home!
- Exhibitor is responsible for providing surge protectors for their Goods. GES is not responsible for loss or damage resulting from power surges. Furthermore, GES' liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less.
- GES is not responsible for voltage fluctuation or power failure due to temporary conditions. Exhibitor is responsible for providing surge protectors for their Goods. GES is not responsible for loss or damage resulting from power surges. Furthermore, GES' liability for any and all loss or damage is limited to the value of the cost of electrical services provided or depreciated value of Goods, whichever is less. All electrical installations and connections to all electrical service should be made by a GES electrician. GES will not be responsible for any damage or loss to any equipment, component, computer hardware or software, and/or any damage or bodily injury to any person caused by the installation, connection, or plugging in of any electrical outlet by persons other than a GES electrician.

If you have any questions, please call us at (800) 475-2098.

Where will my outlet be located?

There are four different types of trade show booths: In-Line Booths, Peninsula Booths, Back-to-Back Peninsula Booths, Pavilion Booths, and Island Booths. Each type of booth has its own standard method of installation. In the following diagrams, the symbol represents the approximate location of power outlets. Main drop locations must be indicated on the floor plan as MDL:

In-Line Booths

Peninsula Booths

Back-to-Back Peninsula Booths

Island/Pavillion Booths

One drop will be provided within the booth when power source is in the ceiling or one location on perimeter when power is in the floor.

In-Line Booths, Peninsula Booths, or Back-to-Back Peninsula Booths:

Your pre-ordered electrical outlet will be installed at the rear of your booth, at the drupe line.

Island or Pavilion Booths:

You need to designate one location for each outlet you order. Multiple outlet locations will be charged on a labor and material basis. For facilities with power originating in the floor, your electrical outlet will be placed at one location at our discretion. All other distribution will be done on a time and material basis. If you fail to provide us with a floor plan, outlet will be placed at one location at our discretion.

How much power do I need?

Calculate your lighting needs by adding wattage in each location. For other equipment, read the ratings from the metal plates attached to each unit.

What is Exhibitor Supervision? An exhibitor chooses Exhibitor Supervised so they are able to instruct the laborer. The exhibitor is required to be in the booth and there are no supervision fees. Scheduling a date and time is necessary for this choice.

What is GES Supervision? An exhibitor chooses GES Supervised when they want the work completed prior to their assigned target date and time. This allows exhibitors to start their booth build at their assigned target date and time. On most shows and services, there is a minimum surcharge for the professional supervision. Remember, when an exhibitor chooses this option, they do not need to schedule a date and time for services to be completed.

Fire Regulations

All orders are governed by the GES Payment Policy and GES Terms & Conditions of Contract as specified in this Exhibitor Services Manual.

AUA 2019 Practice Management Conference

McCormick Place Convention Center, North Building Room N226
May 2 - 3, 2019

All material used in construction and decoration of an exhibit must be flame retardant. Fabrics must be certified as flame retardant or a sample must be available for testing. Materials which cannot be treated to meet the requirements may not be used.

All exits and exit aisles must be kept clear and unobstructed. No furniture, signs, easels, chairs or displays may protrude into aisles. All aisles must be maintained at a minimum of eight (8) feet in width unless otherwise approved on a floor plan.

Designated "no freight" aisles must be maintained clear of crates and exhibit materials during move-in and move-out. These aisles are required for emergency access throughout the hall and to expedite freight and empty crate moving.

All fire hose racks, fire extinguishers and emergency exits must be visible and accessible at all times. This includes fire protection equipment located within exhibits. Exits and exit signs must not be covered by drapes nor obscured from view by exhibit components.

Vehicles on display must have fuel filler caps locked or sealed to prevent escape of vapors and to avoid tampering. Batteries must be disconnected. Auxiliary batteries not connected to engine starting system may be left connected. External chargers are recommended for demonstration purposes. Fuel in the fuel tank shall not exceed one eighth (1/8) of the tank capacity or five (5) gallons, whichever is less.

Combustible materials cannot be stored beneath display vehicles. Space beneath vehicles must be clear and visible except for permitted electrical supplies.

Vehicles in building for unloading must not be left with engine idling. Exhaust gases present extreme hazards to workers on catwalks. If an engine cannot be shut down, the vehicle must be removed from the building as quickly as possible.

Compressed air cylinders, including LPG, are prohibited unless approved by the fire prevention office. Flammable gases, i.e., butane, propane, natural gas, et al; are subject to prior approval. Nonflammable compressed gas cylinders must be secured in an upright position with gauges and regulator protected against physical damage.

All 110 volt extension cords shall be three-wire (grounded), #14 or larger AWG, copper wire. Connectors must not be supported by cords. Two wire "Zip Cords" are not permitted other than factory installed appliance connectors, these may not exceed six (6) feet in length and must be UL approved.

Cube tap adapters are prohibited (Uniform Fire Code 8507). Multi-plug adapters must be UL approved and have built-in overload protection. Connectors must not be used to exceed their listed ampere rating.

Electrical work under carpets must be done, or supervised, by the electrical contractor. All wiring on the floor must be Type "SO" cord, insulated to qualify for "extra hard usage", must be No. 12AWG or larger, and must be protected against injury or damage.

All temporary wiring must be accessible and free from debris and storage materials. Hard backed booths must have power supplies dropped within the booth.

No storage of any kind is allowed behind booths or near electrical service. Materials for handouts must be limited to one day supply and stored neatly within the booth. Violators will be notified and if the materials are not removed by show opening, show decorator will remove and store them at exhibitors expense, without access until the break of the show.

Areas enclosed by solid walls and ceilings must be equipped with approved smoke detectors.

All empty cartons or crates must be labeled and removed for storage or they will be removed as trash. Crates are not to be used as exhibit supports.

Flammable or combustible liquids are prohibited inside of buildings except as approved by the fire prevention office. Flammable thinners, solvents and paints including aerosol cans are strictly prohibited within the building.

Cooking and warming devices shall be electric. Sterno may be used for warming trays. Cooking devices shall be approved by a recognized testing laboratory; e.g., U.L., F.M. Cooking, warming devices, and/or heated products shall be isolated from the public by either placing the device a minimum of four (4) feet back from the front of the booth or provide a plexiglass shield 18 inches high, ¼ inch thick across the front, and down both sides of the demonstration area. Decorative candles are not permitted.

Heat producing equipment is prohibited. Examples of prohibited equipment include, welding, soldering, or any open flame devices.
