

EXHIBIT CONSTRUCTION GUIDELINES

STANDARD BOOTH

DEFINITION: Exhibit consisting of one or more standard units in a straight line.

HEIGHT

Exhibit fixtures, components and identification signs will be permitted to a maximum height of 8'3" (2.5m).

INTENT—If a portion of an exhibit booth extends above 8'3" (2.5m) high, the exhibit booth background will detract from the overall impact of the exhibit directly behind that booth regardless of how the rear of the offending exhibit is finished.

DEPTH

All display fixtures over 4'0" (1.22m) in height and placed within 10 lineal feet (3.05m) of an adjoining exhibit, must be confined to that area of the exhibitor's space which is at least 5'0" (1.52m) from the aisle line for those exhibits with 10'0" (3.05m) depth or more.

INTENT—Each exhibitor is entitled to a reasonable sight line from the aisle regardless of the size of exhibit. Exhibitors with larger space—30 lineal feet (9.14m) or more—should also be able to effectively use as much of the total floor space as possible as long as they do not interfere with the rights of others. The limitation on display fixtures over 4'0" (1.22m) and within 10 lineal feet (3.05m) of a neighboring exhibit is intended to accomplish both of these aims.

IMPORTANT

Space dimensions shown on floor plan are from center line of booth equipment, such as side rails and/or back drape. Exhibit structures must be constructed to allow sufficient tolerance on each side for this equipment and for utility service at rear of booth.
